# Haiou 海鸥医疗

一次性使用呼吸回路
Disposable breathing circuit

一次性使用呼吸回路（加强管）
Reinforced type

一次性使用呼吸回路（波纹管）
Corrugated type

- 采用医用级高分子材料制造，无毒，无刺激
- 符合国际标准的接头，与国内外各种型号麻醉、呼吸机相互匹配，连接牢固，密封性好
- L型接头配有检测口，便于取样和检测
- 集水杯可收集储存管路内的冷凝水
- 单个病人一次性使用，避免交叉感染
- 规格：成人，儿童

- Made of medical grade polymer material, non-toxic and no stimulation
- Connector accord with ISO standard, match with all Anesthesia & Breathing machines, secure connection, reliably sealing
- L type connector with detection port for sampling and testing easily
- Water traps can collect condensate water from breath circuit.
- Single use and avoid cross infection
- Size: Adult and Pediatric

管长 / Tube length	1.2m	1.6m	1.8m	可依客户定制 Customized

➕ 零部件介绍 / Components introduction

丫形三通 / Y- site connector
配有温度和压力检测口，便于同时取样和检测
Equipped with the detection port of temperature and pressure, easy to takesample and test at the same time

积水杯 / Water cup
双垂直接口，使积水杯随时保持垂直状态 最大化使用积水杯的功能，减少管内积水
Double vertical interface, keep the water cup in a vertical position at any time, maximize the function of using water cup, reduce water accumulation in the tube.

加强管 / Strengthen tube
硬度高，抗扭曲性好，不易打折，内壁光滑不积水
The hardness is high, good anti-distortion not easy to bend, the inner wall is smooth without hydrops.

波纹管 / Corrugated tube
透明度高，手感舒适，弹性好，软硬度舒适
High transparency, good flexibility, soft and comfortable.
